Version 5.0.1.0 May 5, 2016... 10 Years of Vipassana..., Open Source Software and OpenSource.org... Open Source Hardware... Open Source  
Mind.. 16. numo-open.org/main/truer-and-other-mudpacks I'm running Linux Ubuntu 16.04.3 LTS, have the truetrack-4 and  
truetrack-9.31.0. TrueRTA version 4.2.3 is available. This version is still not officially released, so it is a... I have a PCR037 TrueRTA V2  
and Truetrack 4 FirePlayer.... .... Allow.... . ctheia.org/for/TrueAudio. Some of the info is not absolute,. . . for later version.Today we're  
announcing a new way to browse the App Store for Android by using your smartphone's front-facing camera. With image recognition, we're  
able to identify and show you apps that have been enjoyed by users. Your head-up camera is a great tool to help you find new apps in less  
than a second. You'll be able to use your camera to find new apps, compare features to apps you own, and see if an app is appropriate for your  
device. We've helped iOS users find the apps they want for over a year. You can also use image recognition to find videos, games, and music  
apps that you may be interested in. Today we're extending this feature to Google Play to help our users find more apps. Why enable this  
feature? We have seen that our users use their front-facing camera to look for apps while they're searching for new content. Asking  
consumers to take screenshots of apps is a tedious manual process and an error prone way of finding apps. In order to make the process as  
smooth as possible, we've developed a method of using your camera in a more natural way. How will image recognition work? In order to  
identify apps in images, we need to gather a large library of screenshots. We've seen more than a million screenshots of hundreds of millions  
of apps, and these images are being fed into our machine learning systems to learn what we can about apps. Machine learning is already
